$lang['index.text'] = 'What is the mining? Mining is the process of adding transaction records
- to cryptocurrency public ledger of past transactions. This ledger of past transactions is called the block chain as it is a chain of
- blocks. Mining is so called because it resembles the mining of other commodities: it requires exertion and it slowly makes new currency
- available at a rate that resembles the rate at which commodities like gold are mined from the ground.<br /><br />A mining pool is a joint
- group of cryptocurrency miners who share their processing power over a network, to split the reward equally, according to the amount of
- work they contributed to the probability of finding a block. A "share" is awarded to members of the mining pool who present a valid
- partial proof-of-work.<br /><br />Find out more about <a href="https://bloc.money" target="_blank">BLOC.MONEY</a>';
